- Investing side-by-side with our clients, unlike many advisors
- Disciplined investment process with favorable, long-term results
- Client relationships build on integrity, trust, responsiveness and objective advice

We invest our own money in the same way we would propose to manage yours. In other words, we eat our own cooking. At Kovitz Investment Group, we invest side-by-side with our clients unlike many advisors.

We believe that our clients deserve a relationship with their financial advisor that is built on integrity, trust, responsiveness and objective advice. Over the course of our history, our disciplined investment process has yielded favorable long-term results for our clients.

As Kovitz Investment Group's 2012 Five Star Wealth Managers, we want to thank those who selected us for this acknowledgement. We attribute our success to a genuine caring about our clients and always putting our clients' interests first. If you are seeking trusted advisors who have their personal funds invested in the same investments as their clients, give us a call.
